98. A computer program product for use with a computer system operatively coupled to a source of content, the computer system capable of executing a viewer program having a plurality of functions related to presenting the content from the source, the computer program product comprising a computer useable medium having embodied therein program code comprising:

- (A) program code for receiving content from the source;
- (B) program code for receiving function authorization data indicating which of the viewer functions may be performed on the content from the source;
- (C) program code for presenting the content with the viewer program; and
- (D) program code for disabling selected viewer functions in accordance with the function authorization data received from the source.

99. The computer program product of claim 98 wherein the disabled viewer functions are selected from the group consisting of print, page set-up, save, save as, view source, save picture as, set as wallpaper, copy, screen capture, print screen and cut functions.

100. The computer program product of claim 98 wherein the viewer program comprises a web browser executing in conjunction with an add-in security module.

F2
~~101. Apparatus for use with a computer system operatively coupled to a source of content, the computer system capable of executing a viewer program having a plurality of functions related to presenting the content from the source, the apparatus comprising:~~

- F2/
- (A) program logic for receiving content from the source;
 - (B) program logic for receiving function authorization data indicating which of the viewer functions may be performed on the content from the source;
 - (C) program logic for presenting the content with the viewer program; and
 - (D) program logic for disabling selected viewer functions in accordance with the function authorization data received from the source.

102. The apparatus of claim 101 wherein the disabled viewer functions are selected from the group consisting of print, page set-up, save, save as, view source, save picture as, set as wallpaper, copy, screen capture, print screen and cut functions.

103. The apparatus of claim 101 wherein the viewer program comprises a web browser executing in conjunction with an add-in security module.

F3/

104. In a presentation program operatively connected to a source of content, the presentation program having a plurality of functions related to presenting the content from the source, a method comprising:

- (A) receiving content from the source;
- (B) displaying the content with the presentation program;
- (C) monitoring user command input to the presentation program; and
- (D) selectively enabling presentation program functions in accordance with function authorization data received from the source.

105. The method of claim 104 wherein (D) comprises:

- HI Contd
- (D1) determining if the authorization data associated with the content defines restrictions on the presentation program functions;
 - (D2) if restrictions are defined, disallowing selected program functions; and
 - (D3) if no restrictions are defined, allowing all presentation program functions.
